

Pureflow

Kagla's patent! Kagla 专利产品!

过滤阀

The Pureflow is a ball valve with a built-in strainer that is developed by Kagla's original technology.

过滤阀是 Kagla 独自研制开发的内藏过滤器的球阀。

It helps to save space for your equipment!

有利于节省空间!

A ball valve with a built-in strainer allow for compact facilities, because it does not require extra valves installed before and behind.

因采用了内藏过滤器的球阀,原来前后都要装配的过滤阀,截止阀都可以省略,实现了设备小型化,节约了面积。

It is easy to clean the strainer!

过滤器的清扫简单!

It can be cleaned easily only by closing the valve and removing the cleaning plug (the side and the base).

关闭阀门,将清洁栓(侧面,底面)取下,便可进行清扫。
